- Tips are always welcome but not expected
 - Artist reserves the right to refuse to tattoo any person, design, words or areas of the body at any time, for any reason, at any given moment.

A quick summary of Tattoo consultation and Design procedures:

- **Initial contact**
- **Book free consult**
- **Meet and discuss all the details.**
- **Design fee sent and received**
- **Designing process and collaboration**
- **Booking your tattoo application day**
- **Free touch ups if necessary**

Free Consultations:

Consultations are an important first step towards developing our collaborative time together. We meet In person whenever possible. This creates an opportunity for artist and client to meet each other and get a better sense of all the expectations and processes to move forward.

During consultations, we will discuss where you are wanting your tattoo, what type of elements you are wanting within your design (bring/send reference pictures), what style (black and grey, color, line... etc), size and application, availability and any other thing you may need to move forward. The artist might also make suggestions to better fit your body, spot and/or time frame in order to create a meaningful piece of artwork that you will treasure for a lifetime. Your design fee with also be determined during this time.

Design Fee:

The design fee is non-refundable. It goes towards whatever time it takes me to design your forever tattoo previously discussed during our consult. Every design is created specifically for each client and will not be replicated once permanently applied. Please keep in mind that you are being charged for a service and all artwork remains the property of Amy Louise of Cat Sass Tattoo. Designing will not start until design fee has been received so you can take whatever time you may need to think it over and/or change your mind.

Design fees are currently on a \$50-\$100 sliding scale based on the research, time and detail necessary to establish your design. This will be determined during the consult. If you are comfortable with proceeding after your free consult, please send discussed design fee amount to catsasstattoo@gmail.com to start the process. Designing does not start until this design fee has been received.

The first drawing sent will be focussing mostly on composition and will evolve towards your ideal finished design. Please take all the time you need looking at the details to be sure you love it.

Once your forever design has been established, it is time to book your application date.

If the original design discussed needs to be changed at clients request to include extra details, elements and/or changes, an additional design fee may be required.

****gift certificates do not count towards the design fee - they are transferable across all services available @ www.amylouise.online***

Booking and Application Fee Details:

A non-refundable \$50 booking deposit is required to secure your booking date and time. This goes towards your first hour as well as covers artists loss of reservation time and preparations of last minute cancel or no-show. You are considered a "no show" if you are 15 minutes passed

your booking start time without communication. To rebook after a last minute cancel or no show will require a \$100 booking deposit.

Original Art Work:

Every design is created specifically for each client and will not be replicated once permanently applied. Please keep in mind that you are being charged for a service and all artwork remains the property of Amy Louise of Cat Sass Tattoo.

Sanitation and Sterilization Procedures

All surfaces and equipment elements are thoroughly washed with green soap and kept clean, before, during and after all sessions. Medicom Dry-Back 2 Ply waterproof Bibs are used as a spill barrier and disposed of immediately after session.

As the tattoo space is a private, in-home, personal space dedicated solely to tattooing, easy and careful monitoring of the space is ensured to maintain high levels of sanitation.

All cartridge needles are one time use only and are only opened directly before use and safely discarded immediately after each session. Inks and distilled water are also one time use only and any remainder after sessions are immediately discarded.

Medical grade masks and non-latex gloves are also used and discarded after each use whenever necessary.

Please be sure to shave your tattoo area the day of your tattoo session. Skin is carefully prepped using a cream based sanitizer and fresh tattoos are cleaned using a solution of distilled water and witch hazel.

Medical grade clear and breathable film bandage wrap is used to lock in skins natural healing fluids and enzymes promoting safe and clean healing during the first 3 days after application.

Artist annually takes and adheres to the safety protocols and information of the Blood Borne Pathogen course available online through NIC.

The safety and integrity of everyone involved is of greatest importance!

Every tattoo comes with a small container of in house made Salve.

All ingredients are harvested, collected and sourced locally.

Ingredients List

- Shea Butter
- Beeswax
- Infused Grapeseed Oil
 - Red Pine
 - Lemon Balm
 - Purple Dead Nettle
 - Yarrow
